1st Method: <u>Install iLexRat with iFile</u>

Open iLexRat.deb file using iFile

Once iFile opens >> Select Installer

Respring

YOU ARE DONE

2nd Method: <u>AutoInstallation Folder</u>

Requirements: SSH Client (iFunbox, DiskAid or iPhone Browser for Windows/Cyberduck for MacOS)

Download DiskAid (recommended) for Windows, or Cyberduck for MacOS

Extract iLexRat.deb file to your desktop

Run DiskAid/iFunbox and connect your iOS (iPhone, iPod or iPad)

 DiskAid/iFunbox will show your device contents, Now navigate to var/root/Media/

Create the folder Cydia/AutoInstall (if not already created)

Move iLexRat.deb file from your desktop to var/root/Media/Cydia/AutoInstall

Reboot your iOS

YOU ARE DONE
